RESPONSE TO OFFICE ACTION OF OCTOBER 1, 2003

RECEIVED

JAN 2 2 2004

Technology Center 2600

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Dear Sir:

This paper is submitted in response to the Office Action of October 1, 2003, to further highlight why the application is in condition for allowance.

Summary of Telephone Interview with the Examiner on January 12, 2004

On January 12, 2004, a telephone interview with Examiner Vo was conducted in which Applicant more clearly explained the distinction between detecting an object via execution of software, e.g., to analyze image data of an object, and physically detecting the object, e.g., through 'physical' means via a sensor. The Examiner agreed that Perry (the cited art) uses software to detect the presence or absence of an object, in contrast to Applicant's system as claimed, where the object's presence or absence is physically detected. The Examiner thus agreed that the rejection based on Perry was overcome.

The arguments against Perry are summarized below.
